In regard to racing being one of the main causes of the loss of the Drummond Castle and Parnassus, neither of these vessels belonged to the Company, and I should therefore not have referred to them, only as the Committee associate their loss indirectly with the question of a sliding scale of freight, which principle, although it did not apply to either, was twice adopted by this Company, I think it right to point out that the Committee have certainly arrived at a conclusion which does not appear to be shared by the Naval Court in the case of the Drummond Castle, so far as I can gather from the published reports of the trial, while I believe in the case of the Parnussus the Captain's certificate was returned to bim in Court. without any reprimand whatever.

NOW READY. imperial quarto. ENGLISH AND CHINESE DICTIONARY, WITH THE PUNTI AND MANDARIN PRONUNCIATION.

An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. INOR comprehensiveness and practical service this Work stands unrivalled. All toe new words which the Obinese have of late years been compelled to coin to express the numerous objects in machinery photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are fully illustrated and explained, forming exer-

cises for students of a most instructive nature. Both the Court and Punti pronunciations are the best principle hitherto attained: The typo- | +f 1671 Hongkong, Shanghai, Cologne (Germany.) in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications. To illustrate the vast scope of the work, the following facts are submitted for consideration. Chalmers! Vocabularly contains about 16,000 Chinese characters, and Medburst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammar, and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which bave one general meaning. Of these examples this work contains more than five times as

many as any other Dictionary hitherto published. For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who under-LOUSE, SHIP, AND STEAMBOAT stands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in TYHE American Ship China it cannot but be invaluable occasionally. It comprises upwards of two thousand large
